Problem Statement 10 · VC Pipeline Intelligence — Components Map

Actor	Trigger	Input	Context	Processing	AI	Output
Vikram (Founder / User)	Opens dashboard or clicks "Refresh now" (public, no login)					Dashboard: who to contact + why, source links, quiet VCs + email drafts, LinkedIn notes, follow-up calendar
Scheduler (Vercel Cron)	Auto-runs twice a week Mon & Thu, 09:30 IST					
System (Next.js Backend)		Loads 50 VCs: name, firm, thesis, status, last contact	Builds live searches per VC firm + partner name, last 30 days	Drops old / duplicate items; batches 8 VCs (only public news sent to AI)		Scores with fixed rubric → recommended action relevance · recency · type · evidence · relationship
Live Data (Google News + Bing News RSS)			Returns live, publisher-dated headlines + article links			
AI Model (Gemini Flash via OpenRouter)					Classifies each article: about this VC? type, relevance (+ reason); drafts why-now & emails	
Database (Supabase)		vc_investors table 50 VCs + Vikram's notes & contact history				Updates ONLY 4 signal columns trigger blocks writes to notes & contact history; run audited

Live app: vc-pipeline-intelligence-ai.vercel.app · Repo: github.com/adityaharsh06/vc-pipeline-intelligence-ai

All AI tasks use Gemini Flash (Google-only routing via OpenRouter) · The pipeline never writes Vikram's notes or contact history
